About this workbook

Enter your data in the Project Tracker worksheet, then scroll through a visual representation of your timeline in the Project Chart worksheet.

The position column in the Project Tracker worksheet, allows you to chart milestones and activities on separate lines. You could, for instance have two milestones/activities that start on the same day and run in parallel. They would overlap in the chart if they had the same position value. Provide two unique values to chart on separate lines. Try it!

As the chart concludes, you may notice markers with no text and no duration set at a specific timeline. As the last milestone scrolls off the chart these markers indicate the end of the milestones in the Project Tracker to chart. Simple scroll back or to the beginning to see the chartable milestones.

About
Dynamic Chart Data (Hidden)

The instructions for each worksheet are in the A column starting in cell A1 of each worksheet. They are written with hidden text. Each step guides you through the information in that row. Each subsequent step continues in cell A2, A3, and so on, unless otherwise explicitly directed. For example, instruction text might say "continue to cell A6" for the next step.

Hidden text will not print.

To remove these instructions from any worksheet, simply delete column A.

This is the last instruction in this worksheet.
